This is a good starting point for an Anti-biased curriculum, but I don't think it has achieved a truly unbiased perspective of culture, community and education. This book reduces certain ethnicities to nothing more than a color with little regard for their heritage, class, or culture. Other ethnic groups are regarded with complete respect and advocacy, so if you happen to have children of the respected groups in your classroom then great! If not, then keep looking for a text that will be more respectful and inclusive of all children, families, faiths, etc...

Anti-Bias Education for Young Children and Ourselves

By Jane Jones

It seems to me that each of us is raised with bias for our own culture and it takes a conscious effort to work with young children and build a program based on being anti-bias. This is not a judgmental statement but just an observation of being a human. I found Anti-Bias Education for Young Children and Ourselves to be an excellent classroom resource to make me more aware to the differences in cultures of the children in my

classrooms and how I could make them part of a new school community that accepts them and their home culture.

Met expectations

By L. M.

It served me well in my class, because I had to share it with others who could not afford a book.
