Perspective, perspective, perspective

By Stephen Pellerine

This is a great 5 star book for MA or EdD researching fellows whom want to look as cases that have been presented to assess speaking in language teaching. Speaking, as an ELL, is viewed from various perspectives, chapters are:

- 1 Introduction
- 2 The nature of speaking
- 3 Speaking tasks
- 4 Speaking scales
- 5 Theoretical models
- 6 Developing test specifications
- 7 Developing speaking tasks
- 8 Ensuring a reliable and valid speaking assessment

So, lets be honest here. This book will probably not make the NYTimes best selling list, but as someone interested in language teaching and the assessment of speaking this book could become your best friend for a few months.

Good discussion regarding speaking assessment

By kandalama01

Most factors regarding speaking assessment were discussed in the book.
Especially the most well organized part is which features should be considered in the speaking test.
As a person who are studying phonetics, this book is worth to read thoroughly.
