Great book for young readers!

By Cart

Now that a few of my children are reaching the older realm, I am always on the hunt for good and wholesome books on a much higher level.

And let me tell you, it can be really hard.

It seems that anything written for modern day children has today's worldly junk in it. Negativity against "annoying" siblings, name calling at school, etc. Not stuff I want my children reading on their own accord. I have honestly found that to get the type of literature I want for them, I must search for old classics, or at least find ones written today that tell a story from generations ago, such as taking place in the prairie days.

And it's alot easier finding those type of stories for girls.

Boys?

So I must tell you how thrilled I was to find No Place Like Holmes by Jason Lethcoe for my book loving 8 year old son. It is written for ages 9-12, but he has absolutely no problem with devouring a book like this.

With short chapters, and just enough fun-loving suspense to keep their minds alert and guessing, it is such a great and simple "mystery" for young boys.

I love the the way readers are kept engaged by giving various situations to solve, and decipher what might happen next. There is even a recipe in the back, that I am just waiting for my son to beg to make, just because "it's in the book". :o)

But my favorite part? Young Griffin shows total respect to his elders, and in fact everyone, even when he is misunderstood and mistreated. He is polite, smart, and witty, and has a healthy curiosity. He trusts God, and learns how faith and prayer can change any situation.

No Place Like Holmes is definitely a winner in both my book, and my sons! (And I know my daughter will enjoy it as well once her brother lets her borrow it!) If you are looking for a quality book for your young boy, I highly recommend it!

Delightful middle-grade read for kids who love mysteries!

By Amazon Customer

I recieved an ARC of this book from Net-galley.

If I was a kid I think I would have enjoyed this much more than I did. It's a cute book, but the description of everything Griffin sees with his all-knowing detectives' eyes gets a little bit irritating. His uncle's an ass, as it the obsession with beating Sherlock Holmes, but luckily towards the end of the book that gets dropped. I was not a fan of the whole twee "I've got a robot butler named Watts and a Moriarty of my own" bit, but I doubt a younger child would pick up on the similarity. I thought the steampunk elements seemed pretty forced, but its big business these days so it's understandable.

This book was very well written, the mystery was engaging, and it was fun to `solve' it along with Griffin. He's a good kid and a great role model. I especially liked the mini-mystery at the end of the books as I was a

huge fan of Encyclopedia Brown and the CLUE series as a kid so it was nice to see that the tradition lives on. I would definitely give this book to a kid, as I think they would really enjoy it. Overall it was a great children's book read!

*This is a Christian book. Griffin's father is an Especial minister, so there is some talk of praying and God. It's not shown in a huge way, nor is it a really big plot point, but it is there.

Fantastic Holmes series for kids!

By In the Bookcase

This is definitely a book that kids will enjoy. It was written by an author with a whimsical imagination! Griffin Sharpe is a young boy with acute deducting skills. He notices the finest details without trying. His mind is always thinking about the situations at hand, and his story will keep curious readers busy trying to catch all the details too.

Griffin is sent to London to visit his uncle, Rupert Snodgrass, who lives at 221A Baker Street (that is 221A, not 221B, mind you). His uncle is a detective/inventor, who lives next door to the famed Sherlock Holmes. And with the story set as is, a mysterious disappearance takes place, Moriarty enters the scene, and young Master Sharpe has landed himself into his first true crime that will test his clever brain.

I found that the author did well in duplicating an inquisitively sharp mind like Holmes' and creating it in the form of a young boy who is eager to discover more. There were parts of the story which I felt were a little corny, or out of place, especially concerning some of the parts pertaining to Holmes and Watson, but it still turned out fine. It was rather funny to compare all of Snodgrass's "inventions" (which he has crafted through steam-power) to the authentic technology we have now. It did add an extra flair of fun to the story, that's for sure. The fact that Rupert Snodgrass had built a robot (and actually named it dangerously close to a certain assistant/sidekick) was a bit over the top for me, but, oh well.

In closing, I must mention that I was most impressed by the way that Lethcoe brought across Christianity and prayer into an adventure story for kids. Well done!!
