## Review

In **VOICES FROM THE COSMOS**, Drs. Scott Jones and Angela Smith provide detailed transcripts of remote viewing/telepathic interviews with members of 18 extraterrestrial (ET) races, including the Large Grays, Nordics, Small Grays, Annunaki and others. These interviews provide answers to some of the perennial ET questions such as: "Who are they?", "Where are they from?", "What, if anything, is their agenda?", "Are they friendly or unfriendly?", "Do they have an interest and stake in sound human development processes on Earth?" etc.

Also addressed in the book is the ET link with the Outer Space Security and Development Treaty. This treaty bans all space-based weapons and at their request, Cosmic Cultures are identified as Parties to the treaty. Crafted by Jones, Dr. Carol Rosin, Astronaut Edgar Mitchell, and other colleagues, it is clear that the ETs are concerned with keeping space a weapon free zone. It is a safe assumption that the ETs can easily verify that the Treaty is being honored. Their request to be included in the Treaty is a very positive sign that other cooperative ventures are in our future.

The authors are joined by the ETs in a call for a pre-disclosure dialogue on the anticipated consequences of established contact, and a detailed plan of how this can be accomplished is provided. Academe at all levels must play a leading role.

The book is a must read for UFOLOGISTS, Exopolitics analysts and all other planetary citizens, both new and experienced with the subject. --Bill Wickersham, Ed.D., Adjunct Professor of Peace Studies, University of Missouri Columbia

As cosmic knowledge, reality and truth unfolds a host of human beliefs and assumptions will be challenged. In over fifty-year of working with ET experiencers I have concluded that the contact event can result in a number of positive outcomes. I consider this book to be one of those positive outcomes. Drs. Jones and Smith have drawn from a lifetime of contact and moved into a rich, largely unexplored area of research. Direct communication and dialogue with sentient life in the cosmos that is complex, ancient, and apparently waiting for the opportunity to tell their stories. Followers of this field and those who are ready to join this enlightened community will be fascinated by what the little Grays say about what most earth authors call

abductions, and the purpose of them. These "take and return" operations are to produce a hybrid race of pioneers that explores and settles throughout multiple universes.

These two authors are uncommon in their contributions that come from both heart and mind. Their combined experience supports critical assessment of the Planetary Plight and the activities of military and government leaders. This is presented with courage, competence and compassion. The huge bonus of this book is the unfiltered voices from the cosmos. Listen to them they are willing to share. --R. Leo Sprinkle, Ph.D. Professor Emeritus Counseling Services, University of Wyoming

Slightly boring ET's interviewed.

By Observer

For me the best part of this book was the analysis and introduction by C.B. Scott Jones with his decades of experience in the field of intelligence, diplomacy, exopolitics and driving forth disclosure. The "interviews" of the various alien races were slightly disappointing, almost as if the rigid questioning mechanism rendered the answers terse and somewhat one dimensional. However it may be, it makes the entities seem possibly slightly less intelligent than one would assume, also spiritually not very developed and rather mechanical. Who knows what the reality is but if this be the level of their development personally i'd rather not make contact. Now be aware that I am of course half joking, but at the same time also half serious. Read the book and see how you feel about it. Possibly the message got somewhat diluted in the remote viewing process and there is more to our cosmic neighbours than might be evident from the dialogue presented here assuming it is genuine. I would hope if intelligence is present all round us in the cosmos it would come through a bit more interesting. I am not discouraging anyone from reading this book on the contrary if the subject matter is dear to you try it and see what you think but you might want to complement it with other material to give a more complete picture.

All is available and progressing forward as this text teaches how to meet an Extraterrestrial.

By C. druehl

As a long time Ufology researcher I can say this is one of the best. I felt such hope in that this text offers a way of understanding the rationale behind Extraterrestrial visitation. I do believe the next quantum leap for humankind is to seek an elevation of consciousness to communicate with these many other species of the Cosmos.

We are, after all, residing in a cosmological 'soup' with much available to fortify and educate as well as balance out the duality forces which can keep us mired in the mysteries of life. There are answers and meaning to this adventure called, Life. This book speaks to the forces of humankind which endeavor to handle this phenomenon. This book also allows one to rest in the knowledge that there is much assistance available to all residents of planet Earth. One of the best books on this topic!!

Informative but not what I was looking for exactly.

By Amazon Customer

This was a long read for me. It's about a very thorough investigation/project in researching various ET cultures, and interacting with them via telepathic communication, and writing down all the answers. Much of the material is repetitive, and I had to skim some because of that reason. Overall I found it to be very thought provoking but more from a "science experiment" POV. I was hoping for more insight into ET cultures, but didn't get that. The entities who assisted more or less had a very neutral voice in giving their answers. I guess that was to compare apples to apples, which I found a tad tedious. Anyway, that's my take on it. If you're thinking "Oh good, now I can get some answers to my personal questions re ETs" this isn't the book for you. Overall, the authors did a great job bringing off a huge project, and for that I commend them.
